Cleveland Clinic Multispecialty Pathology Symposium

This pathology symposium will focus on practical discussions of commonly encountered problems in surgical pathology. The goal is to provide useful tips that the speakers utilize in their own practice at the microscope. We aim to address and discuss common problems and avoid an undue focus on esoterica.

In this course, renowned subspecialists who are highly sought after for their teaching skills will cover a broad spectrum of cases, including genitourinary pathology, thoracic pathology, gastrointestinal pathology, gynecologic pathology, and head and neck pathology. Practicing pathologists, fellows, and residents who attend will maintain, develop, and increase their knowledge, competence, and professional performance, with the intent to improve diagnosis and positively impact patient care.

Who Should Attend?

Pathologists, Pathology Residents and Fellows

By Attending, You Will Be Able To:

- Review staging and handling of renal tumor specimens
- Accurately interpret biomarkers in gastrointestinal lesions
- Review challenges in frozen section interpretation of head and neck lesions
- Discuss when to order biomarkers in gynecologic pathology and how to interpret the results
- Distinguish between lung adenocarcinoma and its mimics on frozen section
